4. Parse Data: List each field and its data type. Refer to Fry (page 8-9, 2007) for examples of description of different data types (string, float, character, integer), you can also create user defined types (some combination that uniquely identifies data like the Index type in the Fry 2007 page 9 example) *

Occupation is string, total employed is integer, while women, white, African American, Asian, Hispanic or Latino are floats.

5. Assumptions: List any assumptions you are making about the data and/or the visualization challenge (aka the project) *

The assumption is that the percentages for the categories are rounded in the same manner.
